SafetyLink[®]
Innovative
Fall Protection

SafetyLinks Classic surface mounted anchor point designed for use on metal roof sheet profiles where access to timber is difficult. Multitude of drilling points to suit different profiles.

- ❑ Marine grade aluminium plate or stainless steel plate.
- ❑ 316 stainless steel eyebolt.
- ❑ Suits a multitude of roof profiles.
- ❑ Surface mounted anchors must not be used for rope access (abseiling).
- ❑ Multi-directional fall protection.
- ❑ Single person energy absorbing anchor.
- ❑ Rated at 15kN.
- ❑ Complies with AS/NZS 1891.4.

SafetyLink's roof anchors are multi-directional. A fall is never an anticipated event when working at heights, therefore the direction of your fall cannot be accurately predicted. All SafetyLink roof anchors are designed and tested as multi-directional.

Benefits of choosing SafetyLink:

SafetyLink's unique designed roof anchors provide fall restraint and fall arrest safety for residential, commercial and industrial buildings. Our roof anchors have patented designs which absorb energy, which means if in the event of a fall the anchor absorbs energy therefore reducing risk of injury to the person and damage to the structure.

Classic surface mounted roof anchor is multi directional, attaching to the top of the profile on the roof sheeting for superior waterproofing.

Classic plate comes in two different grades of material, either marine grade aluminium which is a light weight design, or 316 stainless steel plate.

SafetyLink Eyebolt is forged from 316 stainless steel with powerful energy absorbing qualities.

SafetyLink will provide you with the following:

- ❑ All products tested and manufactured to Australian and New Zealand Standards.
- ❑ All distributors and installers are trained to use SafetyLink products.
- ❑ Supply installation guides, testing results and product sheets.
- ❑ Products tested using a qualified and reputable testing authority.
- ❑ Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- ❑ Installers are qualified to do yearly inspections on your anchors as per Australian and New Zealand Standards.
